

## Fort Ward Playground Virtual Meeting

05.11.2023; 7 p.m.

### Q&A Chat Transcript

Question Details	
#	Question
1	Apologies I joined late — is only location B being explored for the playground location? Is location D still an option?
2	Will proper measures be taken to protect children from vehicles near the pathway?
3	Thank you. Can you confirm the reason site D was taken out of the running?
4	Has city staff contacted the descendant family members of the properties considered for this choice?
5	Will bathrooms be renovated and/or expanded at the park?
6	The management plan called for an identification of of important trees, natural and historic. That information is not available to the public at this time. With trees being protected and cut-down will a list be made available before further work goes on?
7	Site B appears to have minimal to no impact to descendant's families resting place.
8	I like the idea of better managing stormwater in the park and on site B. Will you give consideration to day-lighting Shorts Run which is now buried from below the bridge to the detention pond?
9	The distance for restroom s seems farther for site B. Can you place port-o-johns, as you have near the amphitheater, for site B.?
10	In the design development phase — is there an opportunity to expand the footprint of the playground?
11	I very much like what you have done. I do think that the riffle trench needs historic preservation attention. It's used for recreation access now without any serious management or preservation. I believe the trench is more significant than you acknowledge.
12	Thank you very much. Good job!
